

BRAIN SCIENCE
Lloyd Schaeffer

The study of the Brain and the advancements that are opening up the wonders and intricacies of how our brains work and how we are connected to the rest of our bodies are just a beginning. The more they learn the more they find out they have to learn and that they are still just beginning to see that we are fearfully and wonderfully made.

Donations to the Minnesota Brain Science Foundation will help us fund the study and advancements that were made possible by the efforts of Minnesota's American Legion Family.

Here's to hoping you will no longer have to have someone say to you 'What would you do if you had a brain.'
